

Data Protection Assessment

Align security with current risks and opportunities.

Improve Data Security & Confidentiality

Data is at the core of your daily operations, competitive advantage, and growth. It's also one of the most heavily regulated components of doing business. Loss can occur at any point in the data lifecycle, causing significant impact to your organization.

Using a holistic review of people, processes, and technology, we identify potential vulnerabilities, risks, and control gaps in your data security program. Because your threat landscape and regulations are always changing, assessing your data protection is an ongoing process to align efforts with your current risks, threats, and opportunities.

From compliance to cost savings, we help you mitigate risks and improve protection.

PROCESS

COMPLEMENTARY

Review the existing documentation, evaluate the current state, and deliver high-level recommendations during an 8-16 hour session led by Converge.

TIER 1: ESSENTIAL

Planning & Preparation

Define scope, objectives, stakeholders, and resources.

Data Collection

Identify current practices, policies, and procedures.

Stakeholder Interviews

Review application of current controls and processes.

Analyze & Report

Evaluate and identify possible gaps, risks, and vulnerabilities.

TIER 2: ENHANCED

Strategic Plan

Develop a roadmap for improvements, including detailed initiatives, timeline, resource needs, estimated costs, and other key success factors.
